

Pilot Resource Checklist or What do I need in the cockpit?

For your first flight, you need very little other than an open mind and willingness to learn!

After that, the following items should be with you for each flight:

- Kneeboard (VFR)
- Pen
- Scratch paper (to write down ATC clearances and weather information)
- Airport Taxi Diagram for airports of intended use
- VFR Sectional and Terminal Area Chart (TAC)
- US Chart Supplement
- Aviation headset
- Aircraft checklist (if applicable)
